The Sir Arthur Clarke Award 2019 Categories

Though primarily designed to reward UK teams and individuals for their achievements over the past year, the Awards will, once again, include International and Lifetime Achievement categories open to all.

The 2019 categories are:

1. Space Achievement - Industry/Project Team

This award is made for significant or outstanding achievements by a team, in **space projects**. This includes any activity by a commercial or government organisation that designs, manufactures, supplies or operates space systems, equipment or hardware, or supports and promotes the space industry.

2. Space Achievement - Industry/Project Individual

This award is made for significant or outstanding achievements by an individual, in all space activities. This includes any activity by a commercial or government organisation that designs, manufactures, supplies or operates space systems, equipment or hardware, or supports and promotes the space industry.

3. Space Achievement - Academic Study/Research

This award is made for significant or outstanding achievements in space research by a team or individual employed by an academic organisation. This includes research carried out in any subject related to space, whether in science, engineering, medicine, humanities, art or design.

4a. Space Achievement - Education and Outreach (Team)

This award is made for significant or outstanding achievements in space education and outreach by a team. This includes: formal education at all levels, informal education, education about space, education for the space community (e.g. workforce development), education using space assets/resources, and outreach to the general public or specific target groups.

4b. Space Achievement - Education and Outreach (Individual)

This award is made for significant or outstanding achievements in space education and outreach by an individual. This includes: formal education at all levels, informal education, education about space, education for the space community (e.g. workforce development), education using space assets/resources, and outreach to the general public or specific target groups.

5. Space Achievement - Student

This award is made for significant or outstanding achievements by a school, undergraduate or postgraduate student team or individual, for any space-related activity, from basic research to awards and outreach. Nominees must be no more than 28 years of age on 25 July 2018.

6. Space Achievement - Media, broadcast and written

This award is made for significant or outstanding achievements in space media. This includes any media, related to space, such as journalism, documentary, drama or other entertainment or scholarly record in any form, including written, filmed, broadcast, web/internet-based or staged.

7. Lifetime Space Achievement

This award is made for exceptional achievement in an area of space activity. Examples of this might include lifetime achievement, breakthroughs in space science/technology, space undertakings of global impact/significance, etc.

8. International Space Achievement

This award is made for significant or outstanding achievements which either feature or further an important international aspect in an area of space activity. Selection and judging of this award is carried out by the Arthur C. Clarke Foundation.
